

SapuraKencana Technology Sdn Bhd

Operations & Maintenance Services Division

SapuraKencana Technology Group of companies specialize in providing world class technology, engineering and maintenance services for :

- Turbomachinery equipment in Oil & Gas facilities
- Petrol Stations Automation System
- Offshore Telecommunication Systems

With more than 10 years of business track record and hundreds of years of collective human capital experience, we pride ourselves in being one of the forerunners in providing technology, engineering and maintenance services to the Oil and Gas industry in the region.

As a global player, we also believe in the continuous investment of our facilities and people. Our Gas Turbine Service Centre are equipped with the latest State-of-the-Art machineries while our engineers go through rigorous certification trainings to ensure the highest level of service quality.

Turbomachinery Equipment in Oil & Gas Facilities

Our group provides Maintenance Services and Refurbishment of Heavy Duty Gas Turbines and Rotating Equipment to some of the region's major players in the oil & gas industry. The group's competency is further strengthened by our Joint Venture with GE Oil and Gas, established in 2014 to provide after-sales services for turbomachinery equipment and maintenance services for gas turbines serving PETRONAS group of companies and its Production Sharing Contractors. The Joint Venture local capabilities are fully supported by the OEM experts around the world, striving to deliver the highest standard of integrity, health, safety and environment in our execution of works.

Petrol Stations Automation System

Our competency is not limited to only servicing Gas Turbines. Our Petrol Station Automation System currently powers more than 1,000 petrol stations nationwide and processing more than 3 million transactions daily. Our nation-wide service engineers work around the clock to ensure the high availability of these stations.

Offshore Telecommunication Systems

Our reputation as a one-stop-shop for the Offshore Telecommunication Systems design, supply, fabrication, deployment, commissioning and maintenance for Oil & Gas installations has earned us the trust and contract awards from major names such as PETRONAS, Murphy, Shell, ExxonMobil, MMHE.
